                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>Parametry</b> |
| Zimní model Froddo Paix Up Winter představuje dokonale vyváženou kombinaci pohodlí, funkčnosti a stylu. Tato obuv je určena pro děti, které potřebují teplé, prodyšné a flexibilní boty pro chladné dny. Boty jsou vyrobené z kvalitní přirodní kůže, která chrání před vlhkostí a větrem, zatímco zůstává prodyšná. Vnitřní podšívka z pravého jehněčího kožíšku udržuje nohy v teple a suchu po celý den. Díky dvěma suchým zápalům se boty snadno obouvají a perfektně přiléhají k noze. Flexibilní podrážka z přírodní gumy zajišťuje stabilitu, neklouže a podporuje přirozený pohyb chodidla. Ideální volba pro každodenní nošení do školky, na procházky i zimní dopravní zácpy. Venkovní podšívky z pravého jehněčího kožíšku zajišťují bezpečnou izolaci jehněčí kožíšek vyniká svou schopností udržet teplo i v extrémních mrazích. Přirodní struktura vlny zachycuje vzduch, čímž vytváří dokonale izolující vrstvu, která chrání nohy před chladem i vlhkostí. 2. Přirodní kůže reguluje těplotu - v zimě hltá, v létě nasáká a zabraňuje přehřátí. Díky tomu je obuv vhodná pro celodenní nošení bez pocitu zapálení. 3. Výjimečná měkkost a komfort jehněčí kožíšek je nemísitelný jemný a hebký na dotek, poskytuje přirozené odpružení a pohodlí při každém kroku. Perfektně se přizpůsobí tvaru nohy a zaručuje maximální komfort. 4. Přirozená antibakteriální ochrana. Jihl jako oči vlna obsahuje i jehněčí lanolin - přirodní antibakteriální a samčistící látku, která pomáhá omezovat vznik zápalu a močerní mikroorganismů. 5. Ekologický a udržitelný materiál jehněčí kožíšek je přírodní, obnovitelný a biologicky rozložitelný materiál, který nevyžaduje chemické úpravy. Použití pravého kožíšku zaručuje dlouhou životnost a výjimečnou kvalitu obuvi. Obuv vhodná pro středně širokou až širokou nohu a vysoký nárt. Ultra lehká, pružná a gumovou podrážkou pouze přírodní materiál zateplené včetně stálky ekologicky šetrná výroba bez použití chemických výrobků v Chorvatsku v rámci výroby 100% přírodní kůže vnitřní
