|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>Parametry</b> |  |
| Dámská kotníková obuv Romika spojuje pohodlí, styl a funkčnost. Šurtek je vyroben z kvalitního syntetického materiálu s metalickými prvky, které botě dodávají moderní vzhled. Praktický zip na vnější straně usnadňuje obouvání a zavedení, zatímco šňůrka umožňuje dokonalé přilpůsobení noze. Vnější je zastřešen měkkou a hřejivou podšívkou s každodenním lemem, díky které budete vaše nohy v teple i v chladných dnech. Obuv je vybavena vodododnou membránou Romitex, která chrání před vlhkostí a zároveň zajišťuje prodyšnost. Pohodlná a lehká podrážka s mírným křídlem tlumí nárazy a poskytuje stabilitu při chůzi. Tento model je ideální volbou pro každodenní nošení v zimním období, a to jak do města, tak na venkovské procházky vřek z kvalitního syntetického materiálu, textilní podšívkou a syntetická podrážka. Velice lehká membrána Romitex udrží nohy v teple a sucha. Délka chodidla (mm) 215/202/252/302/352/402/452/502/552/602/652/700.
